CIVILS, GROUNDWORKS AND PLANT HIRE ACROSS SOUTH WALES AND THE UK

Civils, groundworks, trenching, ducting, cable installation, access works and plant hire across South Wales and the UK.

ISO 9001 • ISO 14001 • ISO 45001 • Constructionline Gold •SSIP • CPA

FAMILY-RUN, ESTABLISHED 2020, WORKING UK-WIDE

M J Wilson Contracting Ltd is a family-run civil engineering and construction company established in 2020, operating across South Wales and throughout the UK. From our base in Bridgend, we support contractors, utility providers and renewable energy partners with safe, reliable and high-quality site delivery.

We specialise in civils, groundworks, trenching, ducting, cable installation, access tracks, water services and operated plant hire, providing practical, site-ready support backed by our own plant, operators and material supply.

We work with DNOs, IDNOs, ICPs, principal contractors, developers and private clients, offering practical, site-ready solutions that keep projects moving. Our teams understand the pressures of programme, safety and compliance, and we pride ourselves on delivering work that is completed correctly the first time.

We operate over 85 pieces of plant and machinery, including excavators of all sizes, dumpers, rollers, backhoe loaders and specialist equipment to support every type of civil engineering project.

ACCREDITED

As a Constructionline Gold accredited contractor, we work to industry-leading standards and hold full ISO certification, ISO 9001, ISO 14001 and ISO 45001, ensuring every project is delivered safely, efficiently and in line with best practice.

OUR PEOPLE

Our people are central to everything we do. All plant operators are CPCS or NPORS qualified, supervisors hold SSSTS, and managers hold SMSTS. First aid training, toolbox talks and safety stand-downs are carried out regularly to maintain competence and reinforce safe working practices.

As a family-run business, we believe in developing talent from within. When individuals show potential, we work with them to identify training needs, build new skills and progress through the company.

WHAT WE DO

Seven services, delivered UK-wide with our own plant, operators and material supply. Each is described over the next two pages; call us to talk through a specific job.

01

CIVILS AND GROUNDWORK SERVICES

We deliver groundworks and civil engineering across the UK, supported by our own plant, operators and material supply. Works include excavation, drainage, concrete bases, foundations, stoning-up and reinstatement for utility, renewable and industrial projects.

02

TRENCHING, DUCTING AND CABLE INSTALLATION

We construct trench routes throughout the UK for HV/LV, fibre and communication networks, installing, proving and reinstating ducting systems with correct protection layers, compaction and surfacing.

Our teams also carry out controlled cable laying nationwide, including duct proving, winch-assisted pulls, installation of rollers, socks and lubricants, and the placement of fibre chambers and inspection points.

03

ACCESS TRACKS AND ROADS

We build temporary and permanent access routes across the UK for construction, utility and renewable sites. Works include formation preparation, terram and geogrid installation, stone placement, compaction and finishing suitable for plant and HGV traffic.

04

WATER SERVICE INSTALLATION

We install water service ducting, pipework and chambers throughout the UK as part of utility and infrastructure projects. This includes trenching, bedding, pipe laying, backfill, reinstatement and connection works completed to the required standards.

05 PLANT HIRE SERVICES

We supply operated plant across the UK to support civils, groundworks and utility projects. Our fleet includes a wide range of excavators, dumpers, tractors, rollers and small plant, all provided with trained, certified operators. We deliver reliable machinery, safe operation and responsive support to keep projects moving efficiently.

06 AGRICULTURAL CONTRACTING

We carry out agricultural contracting for farms and landowners, and agricultural reinstatement on infrastructure projects: cultivation, stone-picking, reseeding and land drainage, so that land is handed back in good order once the works are complete.

07 SUPPORTING THE UK'S ENERGY AND INFRASTRUCTURE GROWTH

M J Wilson Contracting Ltd delivers groundworks, civil engineering and utility support services across the UK. With a skilled workforce, modern plant and a dependable supply chain, we provide excavation, ducting, drainage, concrete foundations, access tracks and cable routes for renewable, utility and industrial projects.

See page 5 for our core services and renewable energy experience.

SUPPORTING THE UK'S ENERGY AND INFRASTRUCTURE GROWTH

OUR CORE SERVICES

We support a wide range of infrastructure and utility projects, including:

- Site clearance, vegetation removal and small-scale demolition
- Installation of fencing, gates and secure compound boundaries
- Construction of access roads, crane pads and working platforms
- Reinforced concrete bases, plinths and structural foundations
- Excavation, trenching, duct installation and backfilling for electrical, telecoms and fibre networks
- Street-works compliant reinstatement and surfacing
- Agricultural reinstatement including cultivation, stone-picking, reseeding and land drainage
- HV, LV and fibre optic cable route installation by trenching, direct lay or winching methods

WHAT OUR CLIENTS SAY

"Cardiff Airport has worked with MJ Wilson Contracting on a number of minor civil engineering works as well as larger project activities across our estate. Throughout this time, they have proven to be a responsive and reliable contractor, consistently delivering work to the required standard. Their team approaches projects professionally, communicates well, and responds positively to changing operational requirements. We have appreciated their commitment to quality and their ability to support both planned works and reactive requirements. MJ Wilson Contracting has become a trusted delivery partner, and we look forward to continuing our working relationship on future projects."

MICK FREY, PROJECT MANAGER, CARDIFF AIRPORT

RENEWABLE ENERGY EXPERIENCE

M J Wilson Contracting Ltd plays an active role in supporting the UK's renewable energy sector. We have delivered civils and cable route works for solar farms, wind projects, battery storage sites and anaerobic digestion facilities.

Our involvement includes early-stage enabling works, access construction, ducting, trenching, concrete foundations and final reinstatement. As the industry continues to evolve, we remain committed to supporting new technologies and helping clients deliver low-carbon infrastructure efficiently and safely.

Every project is planned and delivered with a strong focus on safety, efficiency and minimal disruption to landowners, stakeholders and the surrounding environment.

"M J Wilson Contracting are a pleasure to work with. They prioritise getting the job done, look for more efficient ways of working and are always willing to step up when needed. During our Llanwynno wind project, they successfully installed approximately 6 km of 11 kV cable across extremely difficult terrain and through challenging winter conditions. Their flexibility and willingness to take on additional work at short notice made them a cornerstone of the project's delivery."

MARTYN POPHAM, DIRECTOR, CENIN

WHY CHOOSE US

RELIABLE, SAFE, STRAIGHTFORWARD

PROVEN RELIABILITY.

Our teams deliver high-quality work on time, even in challenging environments or under tight deadlines. Clients trust us because we do what we say we will.

STRONG SAFETY CULTURE.

Safety is embedded in every stage of our work, with accredited training, qualified supervisors and regular safety stand-downs.

EXPERIENCED WORKFORCE.

Our operators, supervisors and managers bring practical knowledge, industry qualifications and a "get the job done" attitude to every project.

NATIONWIDE CAPABILITY.

We operate across the UK, supporting projects in rural, urban and industrial settings with the same level of professionalism and care.

MODERN PLANT AND TRUSTED SUPPLY CHAIN.

Using our own plant and long-standing suppliers ensures efficiency, control and consistent quality throughout each phase of delivery.

CLEAR COMMUNICATION.

We work closely with clients, landowners and stakeholders to keep projects moving smoothly, minimise disruption and resolve issues quickly.

COMMITMENT TO CONTINUOUS IMPROVEMENT.

As a family-run business, we invest in our people and processes, ensuring we remain adaptable, capable and ready to support the evolving needs of the energy and infrastructure sectors.
